1.2	Hello World	1
1.3	Nectar application	1
2	Integrated development environment	1

1 Running Nectar software

1.1 Java Runtime Environment & Development Kit

- Install the Java Development Kit (JDK).

```
# apt-get install ant sun-java6-jdk
```

1.2 Hello World

```
$ cat > hello.java
class HelloWorldApp {
    public static void main(String[] args) {
        System.out.println("Hello World!"); // Display the string.
    }
}
^D
```

```
$ javac hello.java
$ java HelloWorldApp
```

1.3 Nectar application

- double click on the *nectar/dist/nectar.jar* file.
- or

```
$ cd nectar/dist
$ java -jar nectar.jar
```

2 Integrated development environment

- Download and install the last JDK (like above).
- Download and install NETBEANS.

```
# apt-get install netbeans-ide
```
